At BS Rollen, we do not rest until we have designed the perfect castor for every requirement. Sometimes castors not only need to be durable and practical, but also aesthetically beautiful.

This is how the **BLACK**DESIGN EDITION came into being: Highest quality and stylish colouring and lacquering. The castors of the **BLACK**DESIGN EDITION are lacquered in a special process that offers extreme durability of the colour and a noble surface structure:

Electrophoretic lacquering (CDP). The electromechanical process creates a uniform of water-soluble lacquer with excellent adhesion and impact resistance.

Our products combine aesthetics, functionality and quality. That's what the name BS Rollen stands for. See for yourself.
